

Feature Update October 2022

Bug Fixes:

- Fixed an issue that would cause the map legend key not to function properly.
- Changed the frame in an action item box on the site map to register click releases properly.
- Changed the map dialogue box to the correct styling.
- For mobile devices, reduced the size of the action item box when adding an action item to the site map to better fit the screen.
- Fixed an issue that could cause the map to reopen in the action item box when adding an action item to the site map.
- Improved the navigation after closing an action item from the map.
- Fixed an issue that would prevent files other than images from being uploaded to the site permits section.
