

# Feature Update May 2023

## **New Features:**

1. Bulk Edit Action Items: add notes and change assignments and target dates for multiple action items at once.
2. Bulk Close Action Items: add closing information and sign off information for multiple action items at once.
3. Bulk Verify Action Items: add verifying information and verify multiple action items at once.

## **Enhancements:**

- Enhanced algorithms surround weather events.
- Reenabled the action item verification feature.
- Added a one-time inspection frequency for scheduled inspections.
- “Close and Verify” option when closing action items to both close and verify it at the same time.
- New rain event threshold: 0.2”
- Added a .csv export to the organization inspection history.
- Reduced the text size on standard inspection reports.
- Reduced the size of buttons on standard inspection reports.

## **Bug Fixes:**

- Fixed an issue where the inspections calendar inspector/assignee filters would stop working.
