Feature Update August 2023

New Features:

1. There are now optional dropdowns for action item titles and descriptions that are responsive to action items connected to questions.
2. An Hourly Precipitation Report has been added to the site page to show hourly precipitation totals for a specified timeframe.
3. Added a Daily Precipitation Report to all organization pages that allows you to see the daily precipitation for all sites for a specified time frame.

Enhancements:

- Reformatted all notification emails.

Bug Fixes:

- Fixed an issue that could cause the "Save Title" button to not save the new title.
- Fixed an issue with the "Save" button falling under the header when editing an action item.
- Fixed an issue that could cause organization logos to not appear on notification emails.
- Corrected an issue that could prevent a new user from activating their account if they selected "View Password" when entering a new password.
- Fixed formatting issues on the account activation page for phones.
