

Feature Update July 2023

New Features:

1. You can now connect action items to questions based on question responses. If you select an answer that needs an action item, the system can prompt or require you to add an action item.

Enhancements:

- Added the capability for all Organization Editors and Site Editors to resend account activation emails.
- Various weather data improvements.
- Added the “Identifier” field to action log reports.
- Added carryover for action items connected to questions so that open action items from previous inspections can be used to satisfy the action item requirements on the current inspection report.

Bug Fixes:

- Fixed an issue with the location of the favorite star in the page headers.
- Fixed a UI layout issue with the dashboard map.
- Fixed a UI layout issue with the footer.
- Fixed an issue that could cause the refresh to update message to appear even if the user had the most recent version.
