

Feature Update February 2024

February 2024

New Features:

- Added customizing action item priorities to the “Settings” section of the form builder. Allows for renaming of our several existing action item priorities and allows up to two additional custom action item priorities.

Enhancements:

- Added pop ups to show weather sources on pages where weather information appears.

Bug Fixes:

- Fixed an issue that could cause inspections to allow information from previous inspections to not copy forward.
- Fixed an issue that could cause second signatures to not function properly if they were missing a label.
